Instructions for Installing ArcGIS 10.3/10.4

You must be on the MIT Network in order to connect to the ArcGIS License server. If you are currently not on the MIT Network, you will need to run a virtual private network. See this page to run one on your home PC:  http://ist.mit.edu/vpn

1. After downloading ArcGIS, extract the files. The files can be extracted with 7-Zip (http://www.7-zip.org/).
2. Once extracted, open the folder and run the .exe file that begins with ArcGIS_Desktop_.
3. Select a destination folder for the installation files, or accept the default destination folder, and then click Next. This will further extract the core ArcGIS for Desktop installation files.

4. Once the installation files have been extracted, ensure that “Launch the setup program” is checked and click close to begin the installation. If a User Account Control notification appears asking you if you want to allow the following program to make changes to your computer, click Yes.
5. The setup program will launch. Click Next and read and accept the license restrictions. This license entitles you to use ArcGIS for MIT purposes only. Click Next.
6. Choose “Complete” installation and click Next.
7. Most users should choose the default location for saving ArcGIS, unless you know you would like the program installed in another location. Click Next.
8. The Python destination folder window opens. Again, most users will choose the default. Click Next.
9. A confirmation window will open. Click Next and the installation will start. This can take up to 30 minutes.
10. A message will tell you when ArcGIS has successfully installed. Click Finish.
11. The ArcGIS Administrator Wizard window will open.
   b. Under “2. Define a License Manager for Concurrent Use products,” choose “Define a License Manager now.” Enter the license manager listed on the web site from which you downloaded the software. It is listed at the top of the page, under “Licensing”. The final page of these instructions highlights the location where the license server is listed.
   c. Click Ok.

You now have successfully installed ArcGIS Desktop. The Administrator and Installation windows may appear. You can close these and begin using ArcGIS Desktop. Email gishelp@mit.edu with questions.
ESRI (ArcGIS) License

ESRI is licensed for use by MIT faculty, staff, and students on both MIT-owned and personally-owned machines for use in education and research.

- Students may install the software on a personal machine only if it is under control of a license-managed, MIT-owned server.
- MIT's agreement specifically prohibits all administrative use of ArcPad software and the Tele Atlas data that comes with ArcLogistics software.

How to Obtain

Licensing

Once the software is installed you will need to designate the license server as: license

Download (Certificate required)

ArcGIS Pro 1.2
- ArcGIS Pro 1.2 iso - 1.83 GB

ArcGIS 10.4
- ArcGIS Desktop 10.4 iso download - 6.46 GB
- Desktop Tutorial Data 10.4.exe - 1.77 GB
- Desktop 10.4 Mapping and Charting Solutions.exe - 634.4 MB
- Data and Maps 2015 for ArcGIS.iso - 4.2 GB
- CityEngine 2015.2.exe - 413.5 MB
